Cloud Solutions

Despite widespread adoption and the introduction of “cloud first” business strategies, many companies still struggle to gain full value from their cloud efforts.

Cloud-native systems are complex and distributed, and they require fundamentally different approaches to development. Organizations must have a clear view of the role they want cloud to play in their business. It requires defining the what and the why behind your investment in cloud and then executing on that vision.

Cloud Strategy

At Sriya Technologies, our application modernization services help you achieve agility for an increasingly digital world. Integrate a combination of accelerators, platforms and strategic partners to modernize core business applications

Modernize applications, improve technical value, harness cloud-based development and develop your digital portfolio with Modernization Acceleration Platform and extended third-party tools.

What We Offer

To ensure the success of projects we feel it is necessary to develop a good working relationship with clients.

From project inception through to the final delivery of the project, you will deal with the same key professionals.

If the project requires specialist third party involvement, we will undertake all liaisons on your behalf. Our key technology partnerships allow us to recommend specialists as required .

We will always offer impartial vendor independent advice and will strive to offer a number of alternative solutions to your requirements.

Partnerships

Our expertise is backed up with strong partnerships with leading software and service companies.

Sriya Technologies partners play an important role in ensuring that we can deliver a full range of professional services to our clients.

We work closely with Microsoft, Siebel, SAP, Hyperion, IBM.

Industry Sectors
